

**KOTHARI INTERNATIONAL SCHOOL, NOIDA**  
**MATHEMATICS ACTIVITY 'MATHABOLA' (GRADES: 6 TO 8)**

For children, playing is as natural and necessary as breathing. Children learn as they play. Most importantly, in play they learn how to learn. Playtime is precious. It builds brain/mental pathways for thinking, creativity, flexibility, empathy and many other lifelong skills. And in the present situation, where children are not able to go out of their homes, the best way to keep them engaged and happy is by providing them a platform where they can play with their friends. Taking care of all the above factors and mental well-being of our students, an online Mathematics Fun activity 'Mathabola' was organized for grades 6, 7 and 8.

The activity was conducted during their regular online session. Unlike the usual Tambola Game, the twist in this game was instead of calling the numbers directly; questions framed on the numbers were thrown up at the students to make it more interesting. Students had to find the number and then match with the numbers from their Mathabola ticket.

The activity reflected the curiosity amongst the learners and their enthusiasm for winning the game was evident. And to appreciate their achievement, e-certificates were given to all the winners. The activity was conducted by the Mathematics teachers and was a huge success.

What we learn with fun and pleasure we never forget. And with that academic learning follows naturally.

**MANN KI BAAT WITH TAMBOLA**

Maths is one of my favourite subjects. Playing "TAMBOLA" I never thought that I would ever enjoy Tambola and work with my friends and the teacher in that game that instead of saying the number directly, the teacher has to give the clue like "I have 10, you have 15" and so on. It was very interesting. I think that I will play the game in my next school year.

Tambola Activity

My Reviews

It was a fun activity because everyone loves Tambola and the numbers are spoken like a math equation so our maths will also be strong and we will also have fun.

My experience of Tambola

once in 3 game was amazing that the first time forward game was like a you need to take in 2 seconds because like your birth date I had a lot of play like these games with my class her I couldn't get that many numbers in those.

With TAMBOLA

Thank you Ma'am for creating Tambola. It was my favourite thing game. I saw people smiling their numbers with enthusiasm. I could never think of playing online with all my friends. I also made my think manifest and made our skills better. In the last one not the last I would say it was a memorable enjoyable and incredible experience !!
