GRADES 11 & 12

INDIA INNOVATION CHALLENGE

Dear Parent,

It is well understood now, that climate change and the pandemic are interlinked. The need of the hour is to use new advances in Science and Technology to measure and mitigate climate risks.

The University of Sydney has announced The India Innovation Challenge where they are looking for bright ideas to come from school students to champion 'Climate Action' in day-to-day life for positive change. The Challenge will provide an opportunity for students and their schools to gain international recognition for the positive social and environmental projects they plan to implement under the **UN SDG Goal 13: Climate Action**.

The students have to form a team with two to three fellow students and a teacher from KIS and then take up the following steps-

1. Prepare a three-minute video explaining your idea.
2. Upload your video on YouTube.
3. Complete the online **application form**

Prizes

1st Prize | Apple® Mini iPads

2nd Prize | Apple® Watch

3rd Prize | Amazon Echo® powered by Dolby® and Alexa®

Prizes and certificates will be presented at an online award ceremony in September.

For further queries and clarification, please get in touch with your Grade Tutor

Looking forward to your participation.

Warm regards

Dr. Sangeeta Arora

Principal, KIS
